

Arizona sheriff calls out DCS

Another little victim of DCS incompetence and (we suspect) lies. Have been in contact with the sheriff and told him what to look for in tracking those "88 contacts" by DCS. The sheriff is really angry about this and plans to get to the bottom of it and I told him to start by tracking all the so called contacts. A person cannot be in more than one place at once and their records will show it if they claim to be. There is such a history of false reports and lies within this agency and the private agency they work with here in Pima County. I hope he is serious and won't let anyone in Phoenix try to intimidate him.

On the one hand you have an agency snatching kids without warrants or court orders illegally to farm out to their contractors with close ties to DCS people so they can use them in their foster care racket and fake "special needs" diagnosis by people incompetent to do so and whose job depends on the diagnosis, then you have children like this one who are virtually ignored. Kids not in danger kidnapped, kids in danger passed around to relatives that the sheriff claims are totally not capable of caring for a child. Time to put someone in jail. Federal authorities looking for snitches, so maybe a little time in jail will loosen their tongues. Another child murdered within 48 hours of this one.

MESSAGE TO DCS: Stop the lying, stop the corruption with your contractors fishing for federal \$\$\$'s. Stop violating all the federal regulations and holding kids hostage for \$\$\$ for many years beyond what the law allows. Get rid of the bureaucrats who persistently lie, lie, and lie again to parents of children kidnapped and to those providing foster care services and those who wish to adopt children and get them out of the DCS/Non-Profit crime ring. Hundreds of us know about your crimes.

Richard Manuel
