

## BE PUT ON NOTICE: THE CHILD WAREHOUSE-INDUSTRIAL COMPLEX

BE PUT ON NOTICE: Our children are warehoused in a “child care” system that is protected by the layers of bureaucracy afforded to government agencies. Government policy currently creates a feeding frenzy for attorneys, through the termination of parental rights and against family reunification, dependent upon the direction of funding. Agencies then end up warehousing the children caught in the middle, at great profit. Children’s’ rights are abrogated to Court appointed guardians, another layer of bureaucracy and potential graft. Removal of children from the caring parent can be a violation of the child’s Constitutional and civil rights. It can lead to the construction of a thoroughly institutionalized and alienated person ready for social failure, mental hospitalization or prison.

There are similar connections between the abduction of children from the U.S., and the difficulties in having them returned to their American parent. Even though the U.S. has signed the Hague Treaty, U.S. enforcement of the Treaty is virtually nonexistent, which has created an atmosphere fraught with international ramifications. One of the elements of retaliation against parents who win cases against “child protective services” is that these Agencies are sometimes able to have a parent with even remote connections to another country deported, without any due process procedure. Unfortunately, the side with the deepest pockets, the most diplomatic pull, and access to the most expensive law firm usually wins these cases.

US WHISTLEBLOWER.ORG intends to reveal names, dates, places and stats about the Child Warehouse-Industrial Complex over the coming months... If you have information about the many abuses in this System, please reach out to us...
